

A practical course on analyzing medical and health data using R AMCHSS, 19th -21st December, 2019

The Achutha Menon Centre for Health Science Studies (AMCHSS) conducted a practical course on analyzing medical and health data using open software environment R. The modules of the course included the use of R in data analysis and for graphics.

The course was well attended by the staff and students of SCTIMST as well as scientists and students from the Govt. Medical College, Thiruvananthapuram and Rajiv Gandhi Centre for Biotechnology, Thiruvananthapuram.

The present course provided a platform for increasing the awareness about the scope and utility of R. In future, intermediate level modules focusing on specialized aspects of data analysis using R will be conducted.
