CORRIGENDUM - TENDER NO. SCT/IMP/2017-18/P5329/SA - TENDER for Servers or Hyperconverged System - Supply, Install, Test and Commission of Servers or Hyperconverged system.

Description in Tender	Specification in tender published	Specification in tender to be read as
Hardware information	The Hyper converged system must be scalable up to 16-Nodes in the future.	The Hyper converged system must be scalable to minimum 16-Nodes or more in the future.
	The Node should be populated with 2 X Intel Xeon E5-2660 v4 processor, 14 Cores 35MB Cache.	The Node should be populated with 2 X Intel Xeon E5-2660 v4 processor, 14 Cores 35MB Cache. Each node should have minimum 24 DIMM slots out of which minimum 12 slots should be populated with minimum of 32 GB DDR 4 memory modules The server should support advanced memory correcting codes and memory mirroring.
	Storage Capacity : Total 18 X 1.2TB 12G SAS 10K RPM SFF HDD to be populated across all the nodes. Two numbers of additional 1.2 TB 12 G SAS to be supplied as cold spare.	Storage Capacity : Minimum 20 TB raw to be populated across all nodes using SAS 10K RPM HD or higher. SATA or NL-SAS HDDs are not acceptable. Two numbers of additional HD to be supplied as cold spare.
	Boot Method: 2 X 64GB SD card in RAID 1 for Hypervisor OS.	Boot Method: 2 X 32 GB or above SD card in RAID 1 for Hypervisor OS
	Redundant Hot swappable Power Supply : Dual 750W AC Hot-Plug Power Supply per node.	Redundant Hot swappable Power Supply : Dual AC Hot-Plug Power Supply per node.
