Two-day Workshop on

Handling Scientific Images for Publication : Techniques&Ethics

on 30 & 31 March 2022

Images are integral part in scientific works which bear the proof of research outcome. In research communications, images, drawings and graphical data presentations are included as figures in digital format. Preparation of figures for publication requires certain level of expertise in digital image processing and graphics editing to meet the publication stipulations. At the same time, the processing and editing should be done following ethical practices to preserve the data and scientific information without alteration. This two-day Workshop on "Handling Scientific Images for Publication : Techniques and Ethics" is planned to provide essential elements of preparing images and figures for scientific publication. Apart from basic lectures, it includes demonstrations on digital image preparation techniques. The Workshop will stress the ethical aspects of image processing and data representation in research communications.
